A brand of UK,  
Now in INDIA

Saving the Environment,  
in a **Cleaner Way...**

**100% Eco Friendly,  
Biodegradable &  
Home Compostable**  
Tableware & Takeaway Packaging

*Good for  
you & the planet*

One of the **LEADING BRAND** of UK,  
Now in India

# DISPOSABLE GREEN®

Disposable Green is our contribution on improving the planet and making this world a better place for everyone. As a brand we are **100% committed** to being truthful about the products and their lifecycle after use and will never willingly make false claim.

Our products are biodegradable and home-compostable - they can fully decompose in your garden or landfill. Having the option to compost at home is hugely beneficial and environmentally friendly.

At **DISPOSABLE GREEN**, we provide a clear choice of products which are home compostable and can be straightaway sent in food bins.

## 100% Eco Friendly, Biodegradable & Home Compostable Tableware

All of our products are designed for circular economy & can either be composted at home or disposed of in landfills. A truly sustainable solution made from nature, which goes back to nature.

## *Areca Palm Leaf*

*Plates, Bowls,  
Platters & More...*

### *Why Areca Palm Leaf?*

Areca leaf is an organic product. When moulded in trays, plates and bowls, they are quite sturdy and free of toxicants. Moreover, they are leak proof and naturally compostable, equally good for both hot and cold, and microwave and oven safe. The color and texture is pretty natural to make each plate look unique in its own way. At Disposable Green, we ensure that only naturally fallen areca leaves are used for making products. The process although simple, does not involve any chemical treatment or other hazardous substances during the manufacturing process. Complete supply chain from raw material sourcing to manufacturing finished goods to market availability is meticulously planned, ensuring we remain true with our commitments. Each product is UV sanitized and packs are shrink wrapped with silica gel to ensure sanctity of products remains intact when it reaches the end user.

100% natural & home compostable.

Thick, light weight, Leakproof & durable.

Each product has a  
unique pattern of leaves.

Ideal choice for parties & other events.

Chemical Free Manufacturing.

UV Sanitized & Moisture Free  
Packaging

Microwave & oven safe,  
can handle freezing upto -18 deg C.

Suitable for all type of food including  
semi gravy & gravy preparations.

ECO  
FRIENDLY

## *Natural Bagasse*

*Plates, Bowls,  
Platters & More*

### *Why Bagasse ?*

Bagasse is a by product generated when sugarcane are crushed for juices. The residual is called bagasse and traditionally burnt in boilers to dispose off. With technological upgrades, this high fiber residue was successfully pulped to be further converted into multiple forms of plates and bowls. When composted, bagasse turns into a nutrient rich fertiliser of nitrogen, potassium, phosphorous and calcium. Bleached and Unbleached are two varieties of bagasse plates available in the market. White ones are bleached to give uniform color and be aesthetically appealing. Unbleached plates are usually different shades in brown color varying on the bagasse composition everytime. Bagasse products are machine made and involve minimum human touch until it reaches end user. The products are relatively cheaper than areca and most suitable alternatives for every customer segment. At Disposable Green, we sell only unbleached bagasse plates due to their non - toxic nature. Bleaching can be a hazardous process and may involve a lot of chemicals and water wastage too. Our bagasse products are ergonomically designed and involve a lot of engineering to ensure sturdiness when contents are poured in and the way surface interacts with food kept in them.

**100% natural & unbleached**

-----  
**Leakproof**

-----  
**Can be used for hot, cold,  
wet & oily foods**

-----  
**Extra strong, sturdy & versatile**
